Support to MAPS4SCIENCE

Datum

6 december 2011

Dear professor van Oosterom,

With great interest that we learned about your initiative to develop a large scale research facility Maps4Science. From our role as data provider, we support your consortium and your application because we see benefits for our organisation and the Netherlands science community.

We hereby declare that our organisation is open to discuss opportunities of this facility for further using and exploring our datasets, in particular all our open-data sets with information about buildings.

Maps4Science is an important initiative that will be a crucial enabler for many scientists to improve and extend their research. Maps4Science will enable the Netherlands science community to reach and keep a top level position in a broad range of science domains. It will allow us to play a leading role in the research and innovation into open, shared, and linked location data and how it can be used in many fields of science.

Your sincerely,

M. Jellema

Directeur DataLand.
